

## CALT Shipping Case

The CALT (Croft Associates Leakage Tester) is built into a robust instrument case, which is suitable for on-site use, hand-carrying and storage.

For off-site shipment, the CALT should be over-packed using the CALT Shipping Case, to prevent damage to the CALT instrument case, and to provide additional cushioning to the electronics and electro-mechanical components built into the CALT.

The CALT Shipping Case is weatherproof and incorporates shock absorbing cushioning. It is designed specifically for the shipment of the CALT by common carrier, truck or airline, without the need for any other packaging.

External dimensions	26" x 20" x 12" depth
Weight	22 lbs
