

TORQUE TOOL for Containment Can Design No 2851

(Product No PN 3980 shown)

The Croft Associates range of Torque Tools is suitable for tightening Transport Container can lids to a predetermined torque setting.

The Torque Tools (an example of which is pictured above) is offered as a direct replacement for hook and pin spanners. This single unit provides a means of tightening container can lids to the required torque setting. The unit is designed to suit a single operator and provide the means to apply the necessary torque control.

The Torque Tool is preset before delivery to the specified torque for the 2851 containment can and the tool also incorporates a reversible ratchet for removing can lids. Information on torque devices outside this range can be provided on request.
