

## TORQUE TOOL (Product No PN 3976 shown)

The Croft Associates range of Torque Tools are suitable for tightening Transport Container can lids to a predetermined torque setting.

The Torque Tools (an example of which is pictured above) is offered as a direct replacement for hook and pin spanners. This single unit provides a means of tightening container can lids to the required torque setting. The unit is designed to suit a single operator and provide the means to apply the necessary torque control.

The Torque Tool is present before delivery to a specified torque range (50 Nm to 200 Nm) and the tool also incorporates a reversible ratchet for removing can lids. Information on torque devices outside this range can be provided on request.
