

SAFKEG® HS/LS DOUBLE HANDLING PALLET

Description

The versatile Double Handling Pallet (Part No 8364) is specifically designed for the efficient handling and transportation of the SAFKEG® HS 3977A and SAFKEG® LS 3979A packages. Equipped with swivelling shackles at each corner and supported by castor wheels, two of which are braked, this pallet ensures ease of movement and stability. For added convenience, it features a removable handle that can be securely pinned in three different positions.

To secure the packages, the pallet is outfitted with eight clamp assemblies, ensuring stable attachment during transit. The multi-functional pallet offers various modes of transportation, allowing flexibility in usage. It can be maneuvered using the pallet handle, a pallet or forklift truck. Additionally, vertical lifting is facilitated by attaching to the four swivel lifting eyes, utilizing a suitably rated multi-leg sling, chain, or spreader bar assembly.

The pallet's lifting capacity accommodates either one or two SAFKEG® HS 3977A or SAFKEG®LS 3979A packages, or a combination of both. With its robust design and adaptable features, this pallet streamlines the logistics and handling processes for both the SAFKEG® HS 3977A and SAFKEG® LS 3979A packages.

Physical Data

Component	Double Handling Pallet Part No 8364
Dimensions	
Width (mm)	1400 (1800 including handle)
Height (mm)	2400 (1000 including handle)
