

SAFKEG® HS/LS HANDLING PALLET

Description

The Handling Pallet (Part No 8065) is designed for the efficient handling and transportation of the SAFKEG® HS 3977A and SAFKEG® LS 3979A packages. The pallet offers a secure and compliant solution for shipment and is compatible with both pallet and forklift trucks, with the packages reliably fastened to the pallet using four clamp assemblies, ensuring stable attachment during transit.

Transporting the packages via the pallet meets the requirements of 10CFR (pt 71) and 49CFR (pts 171-178). This compliance ensures that the pallet is not only a practical choice for handling and transportation but also aligns with essential safety and regulatory guidelines for the shipment of both the SAFKEG® HS 3977A and SAFKEG® LS 3979A packages.
